1167 Active Funds ICAV Factsheet

Global Total Return Bond Fund (A2 Share Class)

Fund Objective and Policy The investment objective of the Fund is to seek to deliver a high level of income yield relative to the yield on US government treasury bonds, over the medium term, by investing in bond, debt and currency instruments in markets worldwide which may at the discretion of the Investment Manager include significant investment in Emerging Markets. A majority of the Fund's total assets will be invested in sovereign and sovereign-related bond, debt and currency instruments in either developed or emerging market countries.

Fund Commentary June's markets saw the US dollar stronger against all currencies; the euro, sterling, yen and EM currencies. Stock markets were up (S&P500 +2.22%) while 10 year US Treasury yields eased again from 1.59% to 1.47% per annum, continuing a meaningful decline from their peak three months ago. Local currency emerging market bonds returned -1.00% (bonds +0.15%, currencies -1.15%) and the Fund's A2 shares returned -0.57% for the month.

DM – The contribution from this area was -0.2%. The yen exposure, introduced a while ago as a hedge for global risk as well as a potential beneficiary of a weak dollar, contributed negatively as the dollar strengthened. We intend to maintain this exposure.

EM hard currency bonds – The contribution from this area was -0.1%. The Fund maintained its short position in HC risk and index HC CDS spreads were slightly tighter. Spreads are historically very tight and we intend to maintain this position as protection against global risk aversion.

EM local currency bonds – The contribution from this area was +0.4% with positive contributions from South Africa (+0.3%), Colombia (+0.2%), Russia (+0.1%) offset by a negative contribution from Peru (-0.2%). The meaningful decline in US Treasury yields over the past 13 weeks is starting to drag EM local bond yields lower, vindicating the strategy of substantially increasing the Fund's duration in April. Exposure to Peruvian local currency bonds was increased slightly with investment in longer dated bonds yielding over 6% per annum. The good performance from lower long rates in South Africa was used as an opportunity to lighten up on duration; seventy percent of the exposure to South Africa bonds was sold, which had the effect of reducing the Fund's overall duration by 0.6 from 6.9 to 6.3.

Currencies – The contribution from this area was -0.7%, with negative contributions from Indonesia/India (-0.3% each), Colombia/China (-0.2% each), Peru (-0.1%) offset by a positive contribution from South Africa (+0.4%). EM currency exposure increased slightly from 86% to around 89%, a meaningful proportion of which continues to be in commodity currencies (Chile, Colombia, Peru, Russia, Indonesia).

Cash – Exposure to short-dated US T-bills and cash increased from around 13% to around 20% of the Fund as a result of the sale of South African long dated bonds.

Performance (note 2)

Share Class / Index	MTD	YTD
A2 (\$ Acc)	-0.57%	-6.48%
JPM GBI-EM GD (\$ terms)	-1.00%	-3.38%
Barclays Global Aggregate (\$ terms)	-0.68%	-3.21%
Barclays Global Aggregate (hedged to \$)	0.50%	-1.52%

Performance fee - All share classes are subject to a performance fee of 15% of the excess return above a hurdle of (3m\$+4%) p.a., calculated annually, with a lifetime High Water Mark (HWM).

1167 Active Funds ICAV Factsheet

Global Total Return Bond Fund

Important Notes

Note (1) – Asset Allocation

The Asset Allocation table provides an overview of the Fund's holdings by percentage of NAV, contribution to overall Fund duration, and non-US dollar currency exposure. Derivatives are included at notional value, except for options, whose exposure is delta-adjusted. Columns and rows might not add up to relevant totals due to rounding error. Source: 1167 Capital LLP.

Sov HC _____ Sovereign hard currency bonds – bonds issued by sovereigns/quasi-sovereigns and denominated in hard currencies such as US dollars, sterling and euro.
Sov LC _____ Sovereign local currency bonds – bonds issued by sovereigns/quasi-sovereigns and denominated in non-US dollar currencies.
Corp _____ Corporate bonds, issued in any currency.
Spd duration _____ Modified spread duration - the approximate percentage increase in an instrument's market value assuming a decrease of 100 basis points (bps) in its yield spread over an appropriate benchmark instrument.
IR duration _____ Modified interest rate duration – the approximate percentage increase in an instrument's market value assuming a decrease of 100 basis points (bps) in its maturity yield.
Bonds _____ Bonds and bond-related instruments denominated in non-US dollar currencies.
FX Instr _____ Currency instruments such as deliverable forwards, non-deliverable forwards and options.

Note (2) - Performance

Fund performance is net of all fees, charges and expenses. Income earned and received by Accumulating share classes is automatically reinvested. Non-US dollar hedged share classes are hedged against movements in the dollar, hence their performance will reflect interest rate differentials (the cost of hedging) between the US dollar and the euro/sterling/krone. The performance of relevant reference indices is shown; JPM GBI-EM GD, is the JP Morgan Global Bond Index Emerging Markets Global Diversified, an index of emerging market local currency sovereign bonds. Source: Bloomberg. The Fund's valuation policy uses New York closing prices for bonds and bond-related instruments and 4pm London WM/Reuters rates for currencies.

Note (3) – Credit Rating as % of NAV

Moody's and Standard & Poor's credit ratings, for each bond and bond-related instrument, are converted to a numerical scale, averaged, and then converted back to a credit rating on the Standard & Poor's scale. For derivatives, the credit rating of the underlying instrument is measured. Sources: Bloomberg for credit ratings, 1167 Capital LLP for calculations.

Note (4) – Value at Risk

The Fund employs an absolute Value at Risk (VaR) approach to determine the maximum global exposure that it can assume. The Fund's VaR as a percentage of the Net Asset Value (NAV) of the Fund must not exceed an absolute limit of 20%, measured using a 99% confidence level and a 20 business day horizon, as defined by the Central Bank of Ireland. Source: Northern Trust (using the StatPro Revolution platform).

Note (5) – Volatility Measures

Moody's and Standard & Poor's credit ratings, for each bond and bond-related instrument, are converted to a numerical scale, averaged, and then converted back to a credit rating on the Standard & Poor's scale. For derivatives, the credit rating of the underlying instrument is measured. Sources: Bloomberg for credit ratings, 1167 Capital LLP for calculations.

Important Notice - Regulatory Information and Risk Warnings

This document is issued for information only by 1167 Capital LLP ("1167") which is a limited liability partnership incorporated in England and Wales under number OC411733. 1167 is authorised and regulated by the UK Financial Conduct Authority with Firm Reference Number 784978.

1167 has obtained this information from various sources and it is designed to be fair, clear and not misleading and to comply with COBS 4.2 of the FCA Handbook (www.fca.org.uk).

Where this document constitutes a financial promotion it is issued and only made available to, and directed at (a) persons who have professional experience in matters relating to investments falling within Article 19(1) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (b) high net worth entities, and other persons to whom it may otherwise lawfully be communicated, falling within Article 49(1) of the Order (all such persons together being referred to as "relevant persons"). This document should not be acted or relied upon by persons who are not relevant persons.

Any investment or investment activity to which this communication relates is only available to relevant persons and will be engaged in only with relevant persons. This communication is being made to professional clients and eligible counterparties only. This document is not for Retail Clients.

The distribution, reproduction or other use of all or any part of this document is prohibited. This document and the information contained within may not be reproduced in whole or in part, nor may they be used for any purpose other than that for which they have been submitted, without the prior written consent of 1167.

The contents of this document do not constitute an offer by 1167 to enter into any contract/agreement nor is it a solicitation to buy or sell any investment. Nothing on this document should be deemed to constitute the provision of financial, investment or other professional advice in any way. The contents of this document are based upon sources of information believed to be reliable, however, save to the extent required by applicable law or regulations, no guarantee, warranty or representation (express or implied) is given as to its accuracy or completeness and, 1167, its members, officers and employees do not accept any liability or responsibility in respect of the information or any views expressed herein. All data is sourced from 1167 unless otherwise indicated. This document may include forward-looking statements that are based upon the managers' current opinions, expectations and projections. 1167 undertakes no obligation to update or revise any forward-looking statements. Actual results could differ materially from those anticipated in the forward-looking statements.

Information Regarding the Fund

1167 Active Funds ICAV ("the Fund") is an Irish domiciled Self-Managed Investment Company which is authorised by the Central Bank of Ireland as a UCITS.

Prospective investors should read in the Fund's Prospectus, Supplements and application form that will exclusively form the basis of any application and an investment should not be contemplated until the risks of investment and tax implications have been considered fully. Tax treatment will depend on the individual circumstances of each investor and may be subject to change in the future. 1167 does not give tax or legal advice. Investors should obtain professional advice on taxation where appropriate before proceeding with any investment.

This document is not aimed at persons who are residents of any country, including but not limited to the United States of America ("USA") and South Africa, where the Fund is not registered or approved for marketing and/or sale or in which the dissemination of information on the Fund or the services of 1167 are not permitted. No contents of this document should be distributed to any third party without the express approval of 1167.

Notice to Persons in the United States: Shares in the Fund have not been, and will not be, registered under the US Securities Act of 1933, as amended (the "1933 Act"), or qualified under any applicable state statutes, and the Shares may not be offered, sold or transferred in the United States of America (including its territories and possessions) or to or for the benefit of, directly or indirectly, any US Person (as that term is defined in the Information Memorandum), except pursuant to registration or an exemption. The Fund is not, and will not be, registered under the US Investment Company Act of 1940, as amended (the "1940 Act"), and investors will not be entitled to the benefit of such registration. The Fund may make a private placement of the Shares to a limited number or category of US Persons.

Performance Information and Risk Warnings

Any performance figures on this document refer to the past and past performance is not a reliable indicator of future results. The base currency of the Fund is in US dollars (USD), and unless otherwise indicated, performance figures are calculated in USD. The return of investors in the Sterling (GBP) and Euro (EUR) classes may increase or decrease as a result of currency fluctuations.

The entire investment is at risk of loss. Values may fall as well as rise and investors may not get back the amount invested. Income from investments may fluctuate. Changes in rates of exchange may have an adverse effect on the value, price or income of investments. Sub-funds may be permitted to and may use leverage as an investment strategy. The effect of such leverage is that movements in the price of the Funds' shares will be more volatile than the movements in the prices of its underlying investments. Investors should be aware that investments in higher yielding bonds issued by borrowers with lower credit ratings may result in a greater risk of default and have a negative impact on income and capital value. Income payments may constitute a return of capital in whole or in part. Income may be achieved by foregoing future capital growth.

Fund charges may be applied in whole or part to capital, which may result in capital erosion. You should be aware of the additional risks associated with investment in emerging and developing markets. The prices of some investments may be extremely volatile. The Fund is not traded on an exchange or recognised market and in common with some of its investments may not be readily realisable during periods of severe market stress.
